Website: https://rogerpender.com/

Full stack web developer with a passion for building websites from prototype to deployment. Adept at working independently as well as collaborating with teams both in person and remotely. Continuing to strengthen current programming skills while learning and utilizing new languages and tools.

TECHNICAL SKILLS

HTML, CSS, Javascript, JQuery, Bootstrap, Firebase, Node JS, MySQL, MongoDB, Express, Handlebars JS, and React JS.

APPLICATIONS BUILT

NYT React Search

- An application that utilizes the New York Times API to pull articles from the user's choice of topic and date range. The user can then save an article to a mongo database or delete the article.
- Technology used: Full stack MERN (MongoDB, Express, React JS, Node JS) App
- https://peaceful-headland-96719.herokuapp.com/
- https://github.com/Rawgher/NYT_React_Search

Eat-Dat-Burger

- An application to track hamburgers you would like to eat or have eaten.
- Technology used: Handlebars, mySQL
- https://vast-ravine-14329.herokuapp.com/
- https://github.com/Rawgher/eat-dat-burger

GameScraper

- An application used to scrape theverge.com/games for current gaming news. The user can store, view, and add notes or comments to an article.
- Technology used: Handlebars, MongoDB, Express, Cheerio, Axios
- https://arcane-shore-42695.herokuapp.com/
- https://github.com/Rawgher/GameScraper

WORK EXPERIENCE

Student Mentor - UC Davis Coding Boot Camp (October 2018 - Current)
Tasked with assisting students with issues they have encounter while coding. Guide students through problem solving, rather than doing the work for them. Work was performed both remotely and in person.

Staff Research Associate II – UC Davis CNPRC (January 2016 – Current)
Perform daily animal husbandry and physical therapy tasks for research subjects. Taken on more leadership responsibilities as lab supervisor transitions roles. Communicate with many onsite and offsite personnel (within California, out of state, and out of the country) on a daily basis. Assist with recording bugs and streamlining the user interface for a robotic device coded in Python.

EDUCATION

University of California Davis, Davis, California
Full Stack Web Development Certificate of Completion 2018
Bachelor of Science, Animal Biology 2014
